Subject ( 9087985 ) Re\_ Grand Prairie indoor air

Hi Carrie,

We do not have plans to sample indoor air. The purpose of our sampling is to obtain the data needed to evaluate each site under the Hazard Ranking System (HRS) and determine if any of the sites are eligible for placement on the NPL. Indoor air samples cannot be used in the HRS.

Bret

Subject Grand Prairie indoor air

Hey Bret -

Do you have an idea of when indoor air will be sampled in homes? From the EPA call yesterday, it sounded like Delfasco area would be Jan/Feb...what about the other 2?

Jennifer,

Attached is a map showing the areas of ground water contamination in the general area of the Delfasco site. In addition to Delfasco, Site Assessment will be looking at NE 15th Street and SE 14th Street. I have also attached a tentative schedule that I provided to TCEQ.

Bret
